

Project Name:	WOLFSON HOUSE
New Build/refurb:	Refurbishment
Form of contract:	GC WORKS/ 2 MINOR WORKS 1998
Contract start date:	March 2008
Completion date:	June 2008
Contract value:	£233,923
Client:	University College London

Project Description:

External XRD works incorporating stone cleaning & repair, overhauling & decoration to windows.

Construction details:

Following the success of the Fry Dome project, T&B has now been instructed to undertake works to Wolfson House.

Wolfson house contains the university’s laboratories and teaching rooms alongside historically important scientific instruments such as the Sir Francis Galton collection.

Works currently being carried out involve cleaning and decoration to the external fascia of the building along with associated repairs and redecoration of the windows.

The building is in full use whilst works are being undertaken.
